

# Integrating with HiddenLevers

## Setting up the Integration

The first time you use HiddenLevers with Riskalyze, you will need to establish the integration:

First, sign in to HiddenLevers and click Portfolio Import.

Click on Riskalyze.

## Single Sign On (SSO) with Riskalyze

The HiddenLevers and Riskalyze integration gives you Single Sign On access to Riskalyze from within HiddenLevers.

## Importing Client Portfolios from HiddenLevers to Riskalyze

You will automatically import portfolios from Riskalyze into HiddenLevers when you set up the integration and you will be able to run all of HiddenLevers stress tests against those portfolios.

You should see this screen when portfolios have been imported:
