

What is HiddenLevers?

Portfolio Stress Testing + Risk Analysis Software

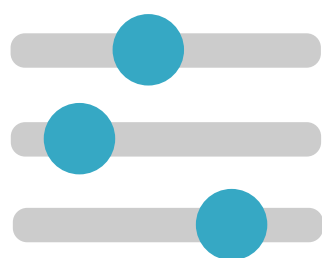

Here's
How
It
Works

- Clients want to understand their **Risk Tolerance** and **Risk + Reward** profile.
- We build real-world **Economic Scenarios** like Interest Rate Hikes, 2008 Repeat, US Default, Market Rises and many more.
- Advisors **Stress Test** client + prospect portfolios, SMAs, or models against scenarios to get results on risk exposure plus potential upside.
- Advisors use white-labeled proposals, interactive tools, and risk tolerance surveys to **Understand Risk + Reward** and better explain to clients + prospects.
